News of how your support is helping animals in Luxor

Fred and Wilma!

Our supporters who follow our work on Facebook will have seen the two **GIANT tortoises** that we are fostering here at ACE!

We have decided to name them after the Flintstones cartoon characters, Fred and Wilma, and they have now settled into their new spacious environment.

Wilma arrived with an overgrown beak which Dr. David trimmed back as she was having trouble eating and now tucks into her food with gusto. We are sure that they are enjoying their new surroundings.

UPDATE

Banana Island Monkeys

We are pleased to tell you that the new monkey enclosure on Banana Island was completed in April.

The troop have moved into their new enclosure which is vastly bigger with swings and ropes to enrich their environment. We have also been gradually introducing them to a more varied and interesting diet.

Not long after we started visiting the monkeys we noticed the female was pregnant, making us even more determined to help. Towards the end of April the baby monkey was born and it has no idea of the cramped conditions that it would have been living in without the kind help from our supporters.

We have continued to check them regularly and are pleased that some of the expat community in Luxor is visiting them too.

We value your support and would like to keep you informed about our

Over The Stable Door

Some of the horses and donkeys that received our help
thanks to you, our supporters

Bonnie

Bonnie is yet another road traffic accident victim and is being treated for a nasty leg wound. She loves to be groomed despite never experiencing this before.

Trooper

Trooper was in a road traffic accident and has a wound on his chest that is slowly healing with the care from our team of vets.

Milo

Milo the donkey is currently hospitalised for a sarcoid close to one of his eyes. Sarcoids are a type of skin tumour and our vets have been victorious in treating these destructive lesions.

Dehydrated Foal

The summer months here are very challenging for both man and beast and we always see cases of dehydrated animals. With temperatures reaching the high 40s it is vital to ensure access to water is a priority.

Boo Boo

Boo Boo unfortunately received a bite from another male donkey and his owner brought him to our hospital for treatment.

Meg and Lily

Both admitted as Lily the foal had a fever. She is well on the road to recovery and looks so much better now. They will be going home in a few days.

animal welfare work and fundraising activities either by post or via email.

The Alexander Dawson School Las Vegas!

£1,280
donated
in memory of
Aumnie Halper
Thank you.

Dear ACE,

On behalf of the students and faculty at the Alexander Dawson School in Las Vegas, Nevada, I have made an online donation of GBP 1,280 (\$1791 US Dollars) to your organization.

This donation is in memory of Aumnie Halper. Throughout her shortened years, Aumnie was an animal advocate who donated her time to many animal causes. At the suggestion of her family, we feel that this is what she would have wanted us to do with the money collected from students and faculty in her memory. We hope this donation provides at least a small amount of assistance toward the continuation of your services.

Today, some of our eighth graders presented Aumnie's mom with the amount raised by our students.

Roxanne Stansbury
Head of School

giftaid it

This is a scheme available to charities and Community Amateur Sports Clubs (CASCs). It means they can claim extra money from HMRC. The charity or CASC can claim an extra 25p for every £1 you donate. That's as long as you've paid the basic rate of tax and make the donation from your own funds. If you are a UK tax payer then please complete the declaration on the donation form to enable us to ensure we receive the maximum amount possible.

Parvo Virus Outbreak

Unfortunately one of the challenges we face here are the recurring outbreaks of Parvo amongst the canine population of Luxor.

Parvo is highly contagious and can be deadly, particularly to puppies and old dogs. It causes sickness and diarrhoea leaving the dog dehydrated and as there are no drugs that are effective against this we can only provide support to the patient's immune system as it battles the virus.

We are currently treating around six dogs DAILY in our small animal clinic.

FOR MORE INFORMATION or for a fundraising pack (most information can be found on our website) please contact Helen on: +44(0)79 7986 5352 or: helen@ace-egypt.org.uk

DONATE though our website, using PayPal or Credit/debit card. Or you can post any donations to: Animal Care in Egypt, 10 Stretham Road, Wicken, Cambridge, CB7 5XH.
