News of how your support is helping animals in Luxor

Thank you!

To all of our kind supporters who continue to assist us through this pandemic. **You have been amazing** with your donations, Amazon Smile and other fundraising initiatives and also making noseband covers with love.

Banana Island MONKEYS

Whilst exploring new places to walk our rescued dogs we re-discovered a place that we were led to believe had closed some years ago. It's called Banana Island and is situated near the Jollie Ville hotel which is also known as Kings Island on the outskirts of Luxor's East Bank.

Mr. Lovely has a somewhat neglected 'antique' shop and told us that he has not had any tourists visit for over ten years now. Whilst looking around we discovered that he has four vervet monkeys accommodated in a small enclosure. They look to be well fed but their environment is very small and lacking enrichment to their lives. They often escape their ramshackle cage but appear to stay close to their home until recaptured.

Over the last few weeks we have built up a good relationship with Mr. Lovely and his family and whilst we would prefer that the monkeys be relocated, Mr. Lovely does not want to give them up. So we have put together a small working party to design and build a much better enclosure for these beautiful creatures.

We will of course update you on our progress...

Female vervets

Male vervet

Over The Stable Door

Some of the horses and donkeys that received our help thanks to YOU, our supporters

Susu

Road traffic accidents happen far too often here and this mare named Susu is being treated by Dr. Mohammed

Prince

Prince, the young donkey was admitted with an infected bite wound that had progressed to an abscess near his ears.

In this photo he looks more like a king!

Mouth tumour

Unfortunately, this youngster was diagnosed with a mouth tumour which was rapidly growing and the kindest action was to end her suffering.

Horse with colic

This horse presented at our hospital with colic and Dr. Marcus diagnosed and successfully treated this patient who was fully recovered the next day.

We value your support and would like to keep you informed about our

Respiratory infection

Dr. Assma examined this donkey in our outpatients' clinic and found that he had an upper respiratory infection. We are very pleased that his owner noticed that his donkey was under the weather and brought him to ACE for treatment.

STRANGLES

Strangles is a highly contagious bacterial respiratory infection which is currently spreading around the horses in Luxor.

Every year we have to tackle this seasonable problem. This infection causes the lymph nodes to swell and can cause breathing difficulties. Unfortunately, we expect to see many, many more strangles cases before the summer months arrive. Usually it's the young ones that lose their lives to this if they don't receive expert treatment in time.

Busy months ahead!

Homemade

We just love that this horse's owner has made a rug, it even has leg straps. This horse is obviously well looked after and arrived at our hospital for de-worming treatment.

Volunteering Programme

Due to the covid pandemic we decided to suspend our volunteering programme but we do hope that we will be in a position to resume this as soon as travel restrictions have been lifted.

animal welfare work and fundraising activities either by post or via email.

2020 Spay Numbers

No matter how you do the maths, the number of unwanted kittens and puppies here in Egypt is heartbreaking. Despite the covid pandemic, our team in Luxor performed...

DOGS
22 spays
10 castrations

CATS
112 spays
84 castrations

Cats and dogs cannot add up but they do multiply! A dog can produce two litters a year with four to six puppies per litter. Cats can produce three litters a year with three to four kittens each pregnancy. We do, of course, offer this service **for free**.

Hassan and Malik

Over the next 3 years we predict to have prevented around 90,000 kittens and 45,000 puppies from being discarded on the streets. There are just not enough homes for all these babies.

Heartwarming

This young lad called Hassan works cleaning cars outside the Nefertari Hotel to help support his family. We were pleased to discover that he has grown much attached to a young street dog and feeds him from the money he makes. To reward him for his kindness we gave him a collar and lead for his new best friend, Malik.

Repair Work

The cool winter months give us an opportunity to carry out repair work and maintenance. Lots of filling and painting continues before the temperatures climb back up to challenging highs.

FOR MORE INFORMATION or for a fundraising pack (most information can be found on our website) please contact Helen on: +44(0)79 7986 5352 or: helen@ace-egypt.org.uk

DONATE though our website, using PayPal or Credit/debit card. Or you can post any donations to: Animal Care in Egypt, 10 Stretham Road, Wicken, Cambridge, CB7 5XH.
